Plan Review	<p>Because this project will disturb less than five (5.0) acres of land area and as required by 327 IAC 15-5-2j, the applicant has certified that either:</p> <p><input type="checkbox"/> 1) The total maximum daily load (TMDL) for the pollutants of concern from storm water discharges associated with construction activity indicates that controls on construction site discharges are not needed to protect water quality,</p> <p style="text-align: center;">OR</p> <p><input type="checkbox"/> 2) In receiving waters that do not require TMDL study, an equivalent analysis demonstrates water quality is not threatened by storm water discharges, and it has been determined that allocations for the pollutants of concern from the construction site discharges are not needed to protect water quality based on consideration of existing in-stream concentrations, expected growth in pollutant contributions from all sources, and a margin of safety.</p>
	<p>Such certification was submitted to the Commissioner of the Indiana Department of Environmental Management (IDEM) who has waived the permit requirements of 327 IAC 15-5 for this project.</p> <p style="text-align: center;">(Documentation from IDEM must be attached to receive a local MS4 Permit waiver by certification.)</p>
